

## YSI Instrument Tune-Up | Service & Repair Department

Fondriest Environmental offers excellent turnaround times and low service costs on EXO, 6-Series, 556, Professional Series, and all other YSI water quality instruments. Tune-Up Service covers all repair labor in addition to:

### Seal Inspection & Cleaning

Seals are cleaned of any contamination that may cause leakage. Damaged or missing o-rings are replaced.

### Cable Inspection & Testing

The cable is subject to a vigorous flex test to check for shorts. Connector and ports are cleaned of any moisture and corrosion.

### Sensor Reconditioning & Calibration

Sensors are reconditioned and calibrated so they are ready for use. New DO membranes are installed with fresh electrolyte solution.

### Circuit Board Performance & Upgrade

Circuit board performance is verified using a resistor box. Software is upgraded to the latest version.

EXO / Pro Series Tune-Up Rates		Legacy Instrument Tune-Up Rates		Additional Services	
• EXO Water Quality Sonde	\$199	• 6-Series Water Quality Sondes	\$199	• EXO Central Wiper Seal Replacement	\$99
• EXO Handheld Displays	\$49	• 650 MDS Handheld Displays	\$49	• 6-Series Optical Sensor Quad Seal Replacement	\$99
• ProDSS Water Quality Meters	\$199	• 556 MPS Water Quality Meters	\$149	• Membrane DO Sensor Reconditioning	\$49
• Professional Series Water Quality Meters	\$149	• Classic Water Quality Meters	\$129		

### Evaluation and Repairs

Upon receipt of the instrument, repair technicians will perform a free evaluation and send a detailed evaluation report and price quote via email to the point of contact.

Repairs are based on customer feedback and are performed only after approval is received.

All repaired instruments are returned with a Calibration Report to confirm that system parameters meet factory specifications.
