

\$129 Service Certificate

Ensure factory specifications & quality data

Quality data can be directly correlated to the condition of your monitoring equipment. Instrument check-up, characterization, and certification by a factory-authorized service center are recommended on a semi-annual basis. In addition to improved data quality, the useful life of the monitoring instrument is extended with regular service.

Fondriest Environmental offers a \$129 service for many YSI products. This certificate can be used with your next YSI service.

The service includes:

- »Inspect & clean seal areas
- »Replace damaged o-rings
- »Confirm circuit board performance to factory specifications
- »Upgrade instrument software
- »Recondition, test, & calibrate sensors
- »Inspect & test all cables & connectors

Send this certificate with your instrument to our service center.

Instruments included:

- | | | |
|--------------|-------------|---------------|
