Optical Dissolved Oxygen Meter for the Lab or Field

SPECIFICATIONS

a xylem brand

ProODO

Digital Optical Dissolved Oxygen Meter

YSI ODO® technology reduces the time required to calibrate and maintain your sensors. And the user-replaceable sensing element only needs replacement about once a year. There are no electrodes to clean or solutions to change. Based on usage, calibrations can be stable for up to one year and are stored in each sensor.

The ProODO Offers:

- Expanded DO range of 0-500% with a response time of T90 in approximately 25 seconds
- Non-consumptive luminescent method eliminates stirring
- Easy-to-read graphic, backlit display and keypad for use in any lighting condition
- Truly field-worthy, impact resistant, IP-67 waterproof case and connectors; rubber over molded non-slip case for extra durability and grip
- User-replaceable cables in lengths of 1- to 100-meters; cable management kit included with 4- through 30-meter cables
- Pro Comm II allows USB connectivity for use with Data Manager software and powers the instrument
- Stores 5000 data sets (sensor data, date, time, site and user defined information)
- Multiple languages include English, Spanish, French, Italian, Norwegian, Portuguese, German, Japanese and Chinese
- 3-year instrument warranty; 2-year cable and probe warranty

Tougher

The ProODO is the best handheld optical dissolved oxygen instrument on the market. Its combination of versatility, field-worthy durability, and data management are second to none. YSI employees have verified the ProODO's rugged design with a waterproof rating, and rigorous drop, cable flex, and strength tests. You'll receive extreme confidence with every purchase. The feature set in this instrument is so extensive, we encourage you to visit ysi.com/proODO or contact us to learn more.

- Easy-to-install cable weights; can be daisy-chained for additional weight
- Rubber over molded IP-67 waterproof case (even without battery cover)
- Rugged cables, sensors, and military-spec connectors
- Drop-tested 1 meter at all angles
- Scratch-resistant lens; viewable with polarized glasses
- Instrument floats
- Weighted, user-replaceable cable lengths
- Military Spec, waterproof connectors with simple quarter-turn locking

With ODO technology, oxygen is constantly moving through the diffusion layer, affecting the luminescence of the sensing layer.

The YSI MS (military spec), waterproof, bayonet-style keyed connectors are far superior to plastic connectors.

This ProODO was submerged in freezing water during a lake study. This is confidence in YSI's ruggedness.

This connector had no problems after a 1/2 mile trip down a gravel road. In fact, the meter had no problems either.

Smarter

The ProODO utilizes “smart” sensor technology which stores calibration data within the sensor. This allows probes to be placed on any ProODO instrument without re-calibration.

The instrument also provides multiple languages, detailed GLP data including sensor diagnostics, on-screen Help to eliminate the need for manuals, security passwords, and much more.

The new laboratory BOD probe, ProOBOD, connects easily to the instrument to provide a unique optical BOD in a very compact footprint. The OBOD has a super-quiet stirrer to improve response times and provide a representative sample.
