

Geotech DC to AC Inverter Quick Start Guide

Inventory

<u>Qty</u>	<u>Description</u>	<u>Price</u>
1	DC to AC Inverter	\$100.00
1	Battery Clips	\$35.00
1	Soft Carrying Case	\$30.00
1	Spare Fuse	\$10.00
1	Inverter quick start guide	\$0.00
1	Purchase DC to AC Inverter Kit	\$100.00

Warning: Do NOT expose the inverter to water and disconnect from battery if it becomes wet!!

Note: Inverter may go into thermal protection and shutdown if not properly ventilated or if used in direct sunlight. Fuse will blow if battery terminals are connected in reverse thus requiring fuse replacement.

Operation

1. Visually inspect the inverter and wiring to assure there are not any cut/frayed wires or physical damage to the unit
2. Before connecting the inverter to your vehicle, make sure the vehicle is running.
Note: Battery will discharge very quickly if vehicle is not running.
3. Connect the Red battery clip to the positive battery terminal
4. Connect the Black battery clip to the system ground or negative battery terminal
5. Connect any equipment that draws **400W or LESS** to the inverter through the AC plug
6. If you're unsure of the wattage $\text{Watt} = \text{Voltage} * \text{Amps}$, please call Geotech to confirm application
7. Use with battery chargers: Monitor charger for first 10min to verify charger doesn't get abnormally warm, if so unplug unit

Please call Geotech (800) 833-7958 with any questions with your rental equipment.
