

RG333 Auto-drain Rain Gauge

- Easy to operate
- Automatically empties every 24 hours
- Minimal maintenance

Description

The Global Water Auto-drain Rain Gauge is a durable weather instrument for monitoring total rainfall. With minimal care it will provide many years of service. Its simple design assures trouble-free operation, yet provides accurate rainfall measurements. The rain gauge sensor can be pole mounted using its included mounting hardware.

Ideal for:

- Stormwater Runoff
- Rainfall Monitoring Studies
- Soil Moisture Studies
