

MUSTANG SURVIVAL

WE SAVE LIVES FOR A LIVING

WATER RESCUE DRY SUIT

MSD576

The MSD576 is the next evolution of Mustang Survival's constant wear "cache" dry suit. This suit is ideal for cache equipment protocols and is based on the functionality of our legendary Swift Water Rescue Dry Suit. We have updated the design and added several new features to improve the mobility and function specific to water rescue professionals.

Exclusive to Mustang Survival, the MSD576 features Rapid Repair Technology™, which enables users to field replace neck and wrist seals and repair small leaks in an hour or less.

GORE-TEX® waterproof and breathable dry suit fabric

1050 Denier ballistic nylon reinforced neoprene elbow pads

YKK metal entry zipper

Adjustable waist band

Comfort fit relief opening

Rapid Repair Technology™ enables users to field replace wrist seals in an hour or less (trim-to-fit neoprene wrist seal standard)

1050 Denier ballistic nylon reinforced seat

1050 Denier ballistic nylon reinforced overcuffs with Velcro® closures for adjustability

Integrated universal size GORE-TEX® dry socks (size XL+ come with jumbo socks)

Rapid Repair Technology™ enables users to field replace neck and wrist seals in an hour or less (CCS™ adjustable neck seal standard)

Two-point attachment removable suspender system for an improved fit, mobility and comfort

SOLAS retro-reflective tape on the arms for increased visibility

1050 Denier ballistic nylon reinforced overcuffs with Velcro® closures for adjustability

1050 Denier ballistic nylon reinforced neoprene knee pads

For cold water applications, combine with Mustang Survival MSL600 Polartec® liner

SIZE	See reverse page
COLORS	 Yellow/Black
CUSTOMIZATION	Agency markings and other colors available by special order
CLO	Immersed Clo 0.66 when worn with Mustang Survival dry suit liner MSL600 and silk weight thermal underwear

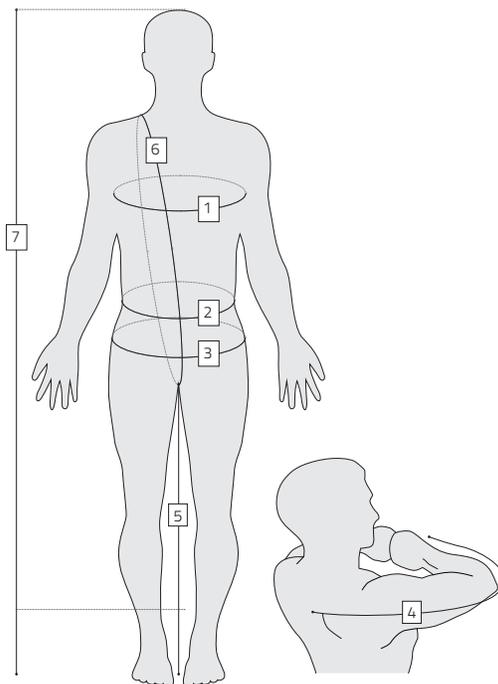

IMPROVED FIT FOR CACHE PROTOCOL DRY SUIT

The improved fit for the MSD576 reduces cumbersome bulk and provides a fit with greater range of motion and comfort than other cache suits on the market. Available in four sizes, please follow the measuring instructions below to determine your optimal fit.

STEP 1

For accurate measurements, please refer to the measurement diagram and instructions provided. All measurements should be taken with a "tailors" (flexible) tape while wearing garments and armour usually worn under the dry suit.

	DESCRIPTION	MEASUREMENT	PROCEDURE
1	Chest		Measure the horizontal circumference around the chest at maximum girth. For males, this is typically where the tape runs under the armpits at the scye. For females, this is at the bustline.
2	Waist		Measure the horizontal circumference around the waist (belt) line.
3	Hips		Measure the horizontal circumference around the hips and buttock at maximum girth.
4	Sleeve		With your arms horizontal, bent at the elbows, and with your fists touching knuckle-to-knuckle out from the chest, measure the distance from the center of the back along the outside of the arm to the outer tip of the wrist.
5	Inseam		Measure the vertical distance from the crotch to the floor. Use a book pressed firmly up between the legs and measure from the top of the book.
6	Torso Hoop		With your shoulders relaxed and the tape running over the center of one shoulder and between the legs, measure the vertical trunk circumference
7	Height		Vertical standing height with good posture and no footwear.

STEP 2

Based on your measurements, determine your size according to the chart below. If all your measurements fall between the ranges of two sequential sizes (such as between S and M) select the size that best fits your Torso Hoop and Inseam.

DESCRIPTION	M	L	XL	XXL
Chest	39-42"	43-46"	45-48"	49-52"
Waist	34-37"	37-40"	41-44"	46-49"
Hips	39-42"	41-44"	43-46"	47-50"
Sleeve	33-35"	35-37"	36-38"	37-39"
Inseam	32-34"	34-36"	34-36"	34-36"
Torso Hoop	65-68"	69-72"	71-74"	76-79"
Height	68-71"	71-74"	73-76"	75-78"

CUSTOM FIT OPTION

If you require a custom fit, Mustang Survival offers the MSD624 Sentinel™ Series Water Rescue Dry suit in semi-custom sizes based our Mobility Based Sizing™ platform. This semi-custom fit option is ideal for personal suit issue protocols and offers a near custom suit without the long custom lead time and price tag.
