

# C-FLUOR LOGGER

Submersible water logger for a variety of measurements.

The C-FLUOR logger connects to one Turner Designs C-FLUOR sensor. The logger records measurements internally at a variety of possible sample rates. Data are offloaded from the logger to a computer via a standard USB cable. The logger is completely self-contained and waterproof. Internal power allows the logger to operate for roughly 200,000 samples.

## FEATURES

- Small diameter
- Comes pre-calibrated
- Fast response
- Low power
- USB communication cable

## LOGGER INFORMATION & SENSOR SPECIFICATIONS

C-FLUOR sensors' calibration comes pre-programmed into the logger, or can be entered by the user with PME software (included with purchase).

Sample Interval	Days of Sampling	Number of Samples
1 minute	130	200K
10 minutes	365+	200K
60 minutes	365+	200K
