

# Tougher. Smarter. More Versatile.

MEET THE REPLACEMENT FOR PRO PLUS

**Pro Plus set the industry standard for years**, but now it's time to say farewell and move toward the future. We are excited to announce the release of **ProQuatro**, YSI's latest handheld in the Professional Series line of products.

We've taken everything you love about Pro Plus and added a new micro USB port for improved data management. ProQuatro was designed to work with the multiparameter Quatro cable as well as the other cables and sensors in the Pro Series family.

Replacing the Pro Plus is no small feat, but we believe that ProQuatro is up to the task with enough power, capability, and flexibility for water quality sampling you can rely on. Let us show you why ProQuatro is a worthy successor to the iconic Pro Plus!

Compatible with all Pro Plus cables and sensors, **ProQuatro** is the new industry standard for low-cost water quality sampling.

## Better tailored to meet our customers' needs.

ProQuatro is designed to be tough, smart, and versatile. All Pro Series instruments, including the ProQuatro, are designed for durability. With IP67 waterproof ratings and military spec connectors, these handhelds work in even the harshest environments.

The addition of a USB port makes the ProQuatro one of the smartest instruments in the Pro Series. Gone are the days of the comm saddle; now users can simply upload their data directly to a flash drive for easy access in the field or the lab.

The ProQuatro is the most versatile handheld in the Pro Series. Connect up to four sensors to a single cable for comprehensive multiparameter sampling. ProQuatro is easily customized to be the ideal choice for low-cost water quality sampling.
